

Multi-society Statement on U.S. Supreme Court Ruling on Students for Fair Admissions, Inc. (SFAI) v. President and Fellows of Harvard and SFAI v. University of North Carolina

As organizations representing a wide range of scientific, engineering, and mathematical disciplines, we will not be deterred by the U.S. Supreme Court ruling on race considerations in college and university admissions.

America's inherent strength and economic competitiveness among nations is its domestic and international talent across every race, ethnicity, gender, and geography. To meet current and emerging job demands and retain our research and development leadership globally, we must broaden who participates in science, technology, engineering, mathematics, and medicine. Doing so will improve lives, advance our nation's living standards, and drive economic growth.

This court ruling will limit the ways our nation might expand talent in STEMM from historically excluded communities. Despite this outcome, we are committed to seeking legally attentive strategies to ensure a full range of talent is recruited, retained, and advanced across STEMM fields. We will continue to advance initiatives that will enable all students to cultivate their talent to the highest potential and tackle societal challenges while serving their communities.
